Hiring Manager
Microsoft Corporation
One Microsoft Way
Redmond, WA 98052

Dear Hiring Manager,

I am writing to apply for the Explore Program Internship at Microsoft's Atlanta office. As a second-year student pursuing a degree in Computer Science and Data Science, I am excited about the opportunity to explore software engineering, product management, and technical program management while contributing to Microsoft's mission of empowering every person and every organization on the planet to achieve more.

Through my coursework, I have built a foundation in computer science and mathematics, completing both introductory programming and calculus requirements. Outside of the classroom, I have developed technical skills through projects and internships that involved Python, Java, and web development, as well as through collaborative problem solving in team environments. These experiences have strengthened my ability to think critically, write clean and efficient code, and communicate effectively.

What excites me most about this program is the chance to work in a pod-based structure that allows interns to gain experience across multiple technical roles. The opportunity to not only contribute to real-world solutions but also learn directly from mentors and peers in a collaborative environment reflects the kind of growth-focused environment I value. I am particularly inspired by Microsoft's commitment to inclusion, innovation, and community building, and I am eager to bring curiosity, creativity, and dedication to my work.

Thank you for considering my application. I would be thrilled to join Microsoft this summer and contribute to impactful projects while expanding my skills as part of the Explore Program. I look forward to the possibility of discussing how my background and enthusiasm align with your team's goals.

Sincerely,

Astin Huynh
