

# Astin Huynh

New Brunswick, NJ • (609) 328-7058 • [astinh huyn h@gmail.com](mailto:astinh huyn h@gmail.com)  
[astinh huyn h.com](https://astinh huyn h.com) • **GitHub:** [astin7](https://github.com/astin7) • **LinkedIn:** [linkedin.com/in/astin-huynh-3a4a24352](https://linkedin.com/in/astin-huynh-3a4a24352)

## Education

**B.S. in Computer Science, Mathematics**

*Rutgers University*

*Sept 2024 – Expected December 2027*

**New Brunswick**

3.75 GPA • Dean's List (Spring 2025, Fall 2025, Spring 2026) • Data Science Club • Blueprint

## Technical Skills

**Programming Languages:** Python, JavaScript, Java, TypeScript, C, SQL

**Frameworks:** React, Vite, Node.js, Express.js, Django, MongoDB, MySQL,

**Tools:** Git, GitHub, VSCode

**Certifications:** AWS Certified Cloud Practitioner

## Experience

**Web Technician**

*Oct 2024 – Present*

*Rutgers Center for Pharmacoepidemiology and Treatment Science*

**New Brunswick, NJ**

- Website management for the Rutgers Center for Pharmacoepidemiology and Treatment Science
- Collaborated with staff to design and develop an AI-powered chatbot for the company website, including collecting information and generating response to address users' general questions

**Backend Software Engineer Fellow**

*Feb 2026 – April 2026*

*Rutgers Blueprint*

**New Brunswick, NJ**

- Engineered a Python/SQLite backend for an AI Scam Detector capstone, implementing full CRUD operations and optimized SQL queries
- Architected secure client-server networks utilizing socket programming, HTTP protocols, and public/private key encryption
- Collaborated via Git/GitHub in an agile team environment during an intensive 8-week backend engineering incubator

**Software Engineer Intern**

*Jan 2025 – Jan 2026*

*Exia Group*

**Remote**

- Built and engineered a website for Exia Group using React frontend
- Worked on a chat bot with a team utilizing neural networks, training them with large datasets of text

## Projects

**Resume Analysis** • [github.com/astin7/smartresume](https://github.com/astin7/smartresume)

**React + Vite, Node.js, MongoDB, Express.js, Python**

- Built a full-stack resume analysis platform with authentication, skill extraction, match scoring, and analysis history using React, Node.js, Express, and MongoDB
- Integrated a job-scraper API to fetch and filter internship postings by role, location, and keywords, enabling users to compare their resume against real job requirements

**CyberMonitor** • [astin7.github.io/cybermonitor](https://astin7.github.io/cybermonitor)

**Python, React, Tailwind**

- Developed a high-performance hardware monitoring application using C# and Python that delivers real-time telemetry with <1% CPU overhead
- Implemented SHA-256 cryptographic signatures and a hardware-ID locked authentication system to ensure software integrity and prevent unauthorized tampering
- Architected a responsive product website using React 19 and Tailwind CSS, managing automated deployment via Vite to a custom production domain

**Stock Market Analysis Tool** • [github.com/astin7/stock-market-analysis-tool](https://github.com/astin7/stock-market-analysis-tool)

**Python, Streamlit, Pandas**

- Engineered a full-stack data application with a Python backend for API integration and data processing, and a Streamlit frontend for interactive user display
- Designed and implemented a vectorized back testing module to simulate and evaluate the performance of algorithmic trading strategies on historical stock data
